PROFILE

Full stack web developer with solid experience in building modern, high-performance web applications. I am a third-year AI and Data Science engineering student (evening program) and I work with recent technologies such as Next.js, React, TypeScript and Supabase. I am curious and rigorous, and I want to contribute to innovative projects with a strong focus on quality, performance and user experience.

PROFESSIONAL EXPERIENCE

Full Stack Developer, PowerLine YC | June 2026 – September 2026

- Led the complete deployment of the application, including production release, infrastructure configuration, environment management and update monitoring, to ensure high platform availability.
- Designed and fully implemented the authentication and authorization system with Better Auth, ensuring secure management of users, roles and sessions.
- Developed and optimized front-end features to improve performance, user experience and maintainability.
- Developed and integrated REST APIs, and contributed to feature updates, bug fixes and continuous improvement of code quality.

Stack: Next.js, React.js, Nest.js, TypeScript, Supabase, Better Auth, PostgreSQL, Redis, Railway, Vercel, Cloudflare, GitHub.

Full Stack Web Developer, EXTEL | January 2026 – April 2026

- Designed and developed high-performance, scalable websites and SaaS web applications.
- Optimized technical SEO (Core Web Vitals, metadata, server-side rendering) to improve organic search rankings.
- Integrated advanced animations (GSAP, Lenis) to create smooth and engaging interfaces.
- Implemented secure authentication and session management with Better Auth.
- Automated transactional emails with Resend.
- Built modern user interfaces with Shadcn/UI and managed data with Supabase and MongoDB.

Stack: Next.js, React.js, Supabase, MongoDB, Shadcn/UI, GSAP, Lenis, Better Auth, Resend.

Full Stack Web Developer Intern, JuniorsCV | June 2025 – August 2025

- Built a complete website with an admin dashboard for L'Escalier Consulting.
- Implemented a CRUD system with data validation using Zod.
- Implemented authentication with Supabase (email/password and Google OAuth) and user role management.
- Designed a responsive and accessible interface with Tailwind CSS, Shadcn/UI and Lucide Icons.
- Deployed the site on Vercel with a custom domain and SEO optimization.

Stack: Next.js, React, TypeScript, Tailwind CSS, Recharts, Supabase, PostgreSQL, Git.

Freelance Virtual Assistant, SCALIKA TUNISIA | July 2024 – February 2025

- Managed social media accounts and automated administrative tasks.
- Strengthened skills in organization, communication and remote work.

Branch Manager, JUST ASK DELIVERY | April 2023 – February 2024

- Supervised operations and optimized logistics through team management.
- Implemented tracking tools to improve delivery punctuality.
- Developed project management and leadership skills.

Web Developer Intern, Banque de Tunisie (BT) | February 2022 – April 2022

- Designed an application for remote management of IT equipment (visualization, monitoring and control).
- Developed a real-time web interface to view equipment status.
- Automated system tasks with Shell scripts.

Stack: HTML, CSS, Bootstrap, PHP, MySQL, Shell.

ACADEMIC PROJECTS

TuniJobs: Intelligent HR Application Management Platform

Recruitment platform with automated, AI-based analysis of job applications, developed in a team (Product Owner, Backend, Frontend).

- Developed the frontend interfaces (Angular and PrimeNG) and integrated them with JWT-secured REST APIs for the three user spaces (Candidate, HR and Admin).
- Designed and built two n8n automation workflows connected to an LLM: structured CV extraction (education, experience, skills) and an automatic candidate/job matching score (0–100%).
- Integrated the candidate journey: CV upload, job applications, and tracking of applications and interviews, with automatic triggering of the AI workflows.
- Connected the application to Supabase services (PostgreSQL database and CV file storage) through the backend APIs.

Stack: Angular, TypeScript, Spring Boot, PrimeNG, n8n, LLM, PostgreSQL, Supabase, JWT, Git.

Taskly: Task Management Web Application

Collaborative web application to create, manage and track team projects.

- Built a responsive interface with Next.js, Tailwind CSS, Shadcn/UI and dynamic components (drag and drop, charts).
- Implemented secure authentication and permission management with Supabase Auth.
- Developed the business logic for managing projects, tasks, users and sprints.

Stack: Next.js, React, TypeScript, Tailwind CSS, Recharts, AG Grid, Supabase, PostgreSQL, Git.

TUNIFLIX: Netflix-Inspired Streaming Platform

Modern streaming showcase website to browse and watch movie and series trailers.

- Built a dynamic, Netflix-inspired interface with responsive trailer display.
- Integrated modal windows for movie details.

Stack: HTML, CSS, JavaScript, Bootstrap.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Angular, TypeScript, JavaScript, Tailwind CSS

Backend: Node.js, Spring Boot, PHP, REST API, Supabase, PostgreSQL, MongoDB, MySQL

Authentication and Email: Better Auth, Google OAuth, Resend

Tools and DevOps: GitHub, Vercel, Technical SEO, Shell

Automation and AI: n8n, Python, OpenAI API, Ollama

Libraries: Zod, Recharts, Lucide Icons, Chart.js, Shadcn/UI, GSAP, Lenis

EDUCATION

Engineering Degree in AI and Data Science, ITEAM University (evening program) | October 2024 – Present

Applied Bachelor's Degree in Computer Science, ISMAI, Kairouan | 2019 – 2022

Baccalaureate in Computer Science, Lycée Hrairia, Tunis | 2019

CERTIFICATIONS AND LANGUAGES

Certifications: Behavioral Intelligence, Natural Language Processing (NLP)

Languages: Arabic (native), French (professional), English (professional)
